DETAILED ACTION

Allowable Subject Matter

Claims 8,10-20 are allowed.

1. The following is an examiner's statement of reasons for allowance: Prior art shows a electric motor comprising: gear housing, and a cup – shaped motor housing that is slipped with an open edge onto the gear housing and fixed there on. Wherein, the end housing has an angular grove into which an encompassing annular bead and radial shoulder is remote from the housing, which is engaged from behind by and annular collar bent inward from the motor housing. Prior art also disclose, the motor housing inclosing a stator and a short circuit ring secured to the permanent magnets. Wherein, an encompassing angular chamfer is slip with positive engagement until the annular end face meets a radial leg face of the chamfer.

However, prior art fails to show the slipped-on region of the motor housing that fits over the gear housing, made by the process of roller-burnished. Wherein, the roller burnishing is done at two points axially spaced apart from one another with two different roller-burnishing tools.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
